

ADIPSYS

Hotspot Manager certified with Alcatel-Lucent Enterprise OmniAccess Stellar Access Points

Hotspot Manager provides captive portal management, along with multiple authentication methods and user session management.

Integration Overview:

The HM solution allows to configure Hotspots and Captive Portals a single interface with a multi-tenant layer.

This solution can be provided as a SAAS service or deployed in white label in the Integrator datacenter or even on the field if needed.

HM leverages the **ALE Wi-Fi OmniAccess Stellar** solution, for operators and integrators wishing to develop hotspot managed services, in scenarios where the ALE embedded portal does not fit customer's requirements.

It will then deal with:

- rich & customized captive portals
- handle legal logs
- providing a centralized hotspot service management interface
- User subscriber management scenarios, including GDPR implications
- hotspot service data analysis

Company Overview:

ADIPSYS
6 rue du 4 septembre,
92130 Issy-Les-Moulineaux

<https://www.adipsys.com/>

ADIPSYS is a software publisher that creates hotspot management softwares. Our services are deployed by Operators and Integrators in overlay to a Wi-Fi infrastructure.

CAUTION: This validation provides customers with confidence that a partner's integration with an Alcatel-Lucent Enterprise on-premises platform is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

However, be aware, this document is associated with an InterWorking Report (IWR) available on the ALE Business Portal which give all possible restrictions and limits.
