Alcatel-Lucent SASE
Advancing Secure Connectivity with Versa Networks SASE

Seamless, Scalable, and Secure Network Solutions for the Digital Enterprise.

VERSA NETWORKS

Alcatel·Lucent
Enterprise

Helping organizations address today's challenges

In a fast-evolving digital landscape, enterprises need secure, reliable, and cost-effective connectivity.

Cost savings
Enterprises can save up to 70% of WAN costs leveraging SD-WAN.

Business Agility
Speed is value. SD-WAN deployment takes as little as 8 to 48 hours.

Advanced Security: SASE
Comprehensive security, visibility & control over traffic, users & IoT.

Connections optimization
50% of data traversing the enterprise WAN is coming from and goes to Cloud applications.

Improve Cloud app performance
40x improved performance for Cloud and SaaS applications.

VERSA NETWORKS
Recognized as **Leader in the Gartner Magic Quadrant**

Security Service Edge
Zero Trust Network Access (ZTNA)
Cloud Access Security Broker (CASB)
Secure Web Gateway (SWG)

Firewall as a Service (FWaaS)
Data Loss Prevention (DLP)
Remote Browser Isolation (RBI)
Advanced Threat Protection (ATP)

Secure SD-WAN
SD-WAN
Routing
NGFW
In-Line CASB & DLP
ZTNA on-premises
Sites, Users, Devices

Unified SASE
SASE-as-a-Service
Private SASE
Sovereign SASE

AI Ops
Identity Broker
Digital Experience Monitoring (DEM)
User Entity Behavior Analytics (UEBA)
Software Defined Adaptive Micro-segmentation
Co-Pilot

Improve Cloud performance
NGFW
IoT /OT Security
IPS/IDS
Advanced Threat Protection (ATP)
GenAI Firewall

Transforming Enterprise Connectivity & Security
Future-Ready SASE Solutions for Secure, Scalable, and Agile Networking

End-to-end Security with SASE
Integrated Zero Trust Architecture (ZTNA), advanced firewalls, and AI-driven threat prevention enable full protection for branch offices, remote workers, and cloud applications.

Seamless Cloud & Multi-Site Connectivity
Smart traffic steering, direct SaaS access, and automated application routing optimize performance and reduce latency for Microsoft 365, Salesforce, and other business-critical applications.

Simplified & Scalable Network Operations
With centralized orchestration, policy-based automation, and flexible deployment options, IT teams can reduce complexity, improve agility, and lower operational costs.

In today's digital-first world, businesses need **flexible, secure, and high-performance networks** to **support hybrid work, cloud adoption, and evolving security threats**. The Alcatel-Lucent Enterprise (ALE) & Versa Networks partnership delivers **SASE and secure connectivity** solutions tailored for any business requirements.

Comprehensive Networking and Security in One Solution

Advanced Security & Management

- **Integrated Next-Generation Firewall** with Unified Threat Management
- Sophisticated **analytics** and single-pane-of-glass visibility
- **Open APIs** for customization and advanced security analytics

+

Seamless Integration

- Easily **fits into existing** network architectures
- Integrates routing and SD-WAN with security functions

+

Built-in Multi-Tenancy

- Genuine multi-tenancy support for **scalable deployments**

+

Flexible Deployment Options

- Available as DIY, Managed Service, or Co-Managed
- Management works in cloud shared (dedicated, AWS, etc.), private, or on-prem environments
- The CPE (customer premises equipment) could be cloud, public, private (in VM environment, for example) or on-prem

Robust Features
Designed to manage complex networks and ensure business continuity.

Highly Customizable
Tailored options for policies, security, and deployment to meet diverse needs.

Enterprise-Ready
Ideal for organizations needing top-tier performance and flexibility.

Versa Secure SD-WAN **simplifies and secures enterprise connectivity** to multiple cloud services by integrating advanced networking and security features like SD-WAN, firewall, malware protection, and micro-segmentation into a single platform.

It optimizes direct cloud access, intelligently routes application traffic, and provides built-in security validated by third-party standards. Versa's multi-tenant, cloud-native solution enables enterprises to **efficiently scale and manage secure, high-performance multi-cloud connectivity tailored to diverse business needs**.

Unlock Next-Level Networking: Secure, Seamless & Future-Ready

Struggling with network performance issues, cloud adoption roadblocks, or security gaps?

Your business deserves a smarter, more secure, and more efficient solution.

Whether you're in healthcare, education, transportatio, energy & utilities, hospitality or industry, we help you stay connected and protected with cutting-edge **networking solutions tailored to your industry's unique needs**.

If you're managing **hybrid workforces, multi-branch networks, or migrating to cloud applications** like Office 365 or Salesforce, ALE provide the security and performance your business demands.

Plus, our zero trust (ZTNA) approach replaces outdated VPNs, ensuring secure remote access and ultimate peace of mind.

Don't settle for outdated, complex, or vulnerable networks.

Take control with a solution that consolidates networking and security into one powerful platform. Let's transform your IT infrastructure: boost efficiency, fortify security, and simplify management.
