

AMPHITECH

Door phones certified with OmniPCX Enterprise™ and OXO Connect

Specialized in communication systems, AMPHITECH is aimed at professionals with weak currents. Its expertise, innovation, the reliability of its equipment has made AMPHITECH the reference in the fields of the telephone, the emergency call and the elevator tele alarm

Integration Overview:

The IPAC 500 doorman's function is to control access to buildings. It meets the requirements of the Regulations on accessibility for disabled people to collective buildings or buildings receiving from the public (ERP). The IP-GAP are an audio or audio-video intercom, fully IP "hands-free" and vandal-resistant. These products are equipped with illuminated pictograms and voice synthesis to promote accessibility for people with disabilities.

Integration details:

Amphitech has been specialized in the design and manufacture of communications equipment such as telephone gateways, emergency call stations, elevator telegrams. Amphitech is now a leader in its field of activity.

CAUTION: This validation provides customers with confidence that a partner's integration with an Alcatel-Lucent Enterprise on-premises platform is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering. However, be aware, this document is associated with an InterWorking Report (IWR) available on the ALE Business Portal which give all possible restrictions and limits.
