Alcatel·Lucent
Enterprise

Novalink
Novaalert certified with
OmniPCX Enterprise™ an OXO Connect™

novalink
EXPERIENCE INNOVATION.

Novaalert is the solution for flexible, fast and secure alerting, evacuating and notification. It is the instrument for a comprehensive emergency, alerting and messaging plan which initiates targeted measures. With novaalert, the event driven notification of dozens of people within seconds of an event is assured. Security and reliability are of the utmost priority.

Integration Overview:

Novaalert and Alcatel are perfectly integrated.
All information from all interfaces processed in novaalert can be transmitted via Alcatel SIP and paging functions. Users receive the important informations for their activities directly on their Alcatel device.

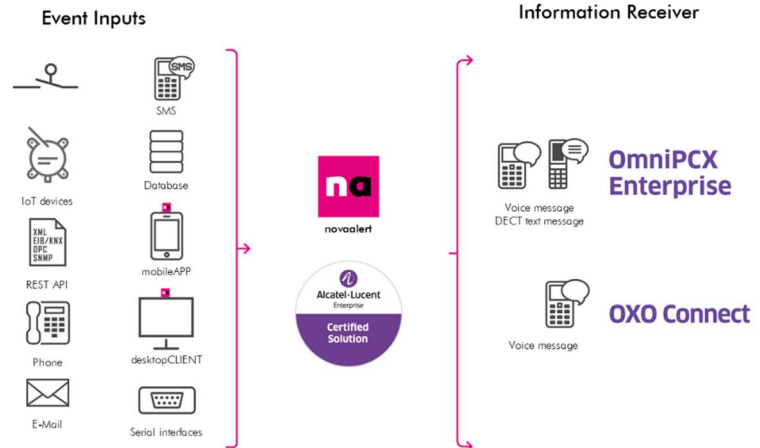

SysHotel GENIUS
by SYSDAT TURISMO
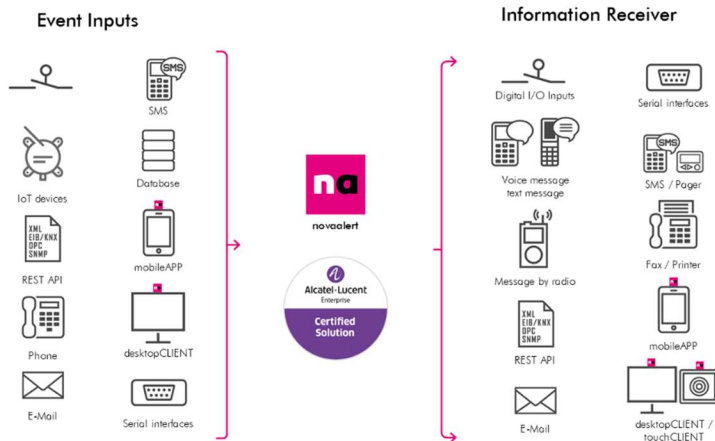

Integration Details:

The interface enables the following:
- Alarm and Notification calls for DECT
- Display text and special ringing for DECT

Novalink was founded in 1996 and since then has established itself as a software producer on the ICT market and as a service provider in the IT sector. The products and business solutions of the Swiss manufacturer - particularly in the alerting and personal protection field - have proved themselves repeatedly and can be integrated into any working environment thanks to standardised interfaces.
