The power consumption measured with redundant PSU on all models. OS6870-P24M, P48M and V12 models are equipped with OS6870-CNI-U2 module.
Heat dissipation is calculated for power consumption at full load. 1 watt ≈ 3.41214 BTU/h.
The acoustic level measured per ISO7779. The measurement is done with 1 PSU @ 50% PoE load.
MTBF is measured 25 °C ambient temperature with one AC power supply as per Telcordia SR-332 issue 4 standard.
Fully populated weight measured with redundant PSU on all models.
